

Mental Health First Aid teaches identification, understanding and responding to signs of mental illnesses and substance use disorders.

National Community Pharmacy Association (NCPA) partnered with Mental Health First Aid USA to develop pharmacy-specific patient cases for use during the 8-hour ACPE accredited training program. The cases are available for all certified instructors at mentalhealthfirstaid.org

The pharmacy-specific patient case resource was made possible by a grant from the Community Pharmacy Foundation.

25 Pharmacy-Specific Scenarios across 5 Topic Areas

1. Depression/Anxiety

2. Panic Attack

3. Suicide Risk

4. Psychosis

5. Substance Abuse Disorder
